Graduate School Guidance

- Participants are encouraged to see their ROAR counselor to discuss the graduate school selection and preparation process. The Center for Student Learning offers graduate school examination preparation courses throughout the school year at little to no cost to the student preparing for graduate school entrance exams. Your ROAR counselor will also review graduate school essays and write letters of reference. This assistance will continue to be available to Scholars even after they have graduated from the College of Charleston should they decide to investigate post baccalaureate programs at a later time.
